**Hy-WALL “THE SAFE STORAGE SOLUTION FOR ULD’S”**

Verge Hy-Wall Barrier™ is the superior barrier solution designed for the safe compounding of stillages, ULD stackable crates and pallets.

Verge Hy-Wall Barrier™ offers complete protection by containing falling items should a stack of stillages topple. Our unique system will also withstand impact from a laden forklift in the event of an accidental crash. This fully self-standing structure is a modular design providing total flexibility of the required compound size without relying on the structure of the building.

Although Verge Hy-Wall Barrier™ is constructed from module components each structure is specifically designed to meet the desired application. Verge Hy-Wall Barrier™ comes in several height options ranging from 1.5m – 5.5m. Installation is quick and easy, thanks to the simple modular componentry precisely manufactured.

## Applications: Features:

- ✓ Warehouse and distribution
- ✓ E-commerce outlets
- ✓ Post and parcel freight facilities
- ✓ Wool stores
- ✓ Modular bolt together barriers system with multiple height options designed to contain ULD stillages from falling onto equipment or personnel if toppled.
- ✓ Material – mild steel
- ✓ Finish – Yellow
