# Ask us about our Verge ECO-Rail™ for on the ground floor

The **ECO-Rail™** (originally created for the factory floor) is a 1m high handrail system designed to keep personnel from straying from designated pathways into harm way. The **ECO-Rail** is a flat pack modular barrier system that comes in 3m kits that simply lock together with couplings to form a continuous barrier at your desired length.

It's easy to order and install – Start with a **STARTER BAY**, add as many **ADD-ON BAYS** as you require, and finish it with an **END-BAY**. We want to make it as easy as possible for you, so if you would like assistance give us a call.

The **Verge ECO System** works well with our **V-Gates™**.

The **Verge-ECO™** rail is a 1m high handrail system designed to keep personnel from straying from designated pathways into harms way.
