Verge Safety Barriers Pty Ltd

Verge Hy-Wall Barrier™

Hy-WALL “THE SAFE STORAGE SOLUTION FOR ULD’S”

Verge Hy-Wall Barrier™ is the superior barrier solution designed for the safe compounding of stillages, ULD stackable crates, and pallets.

Verge Hy-Wall Barrier™ offers complete protection by containing falling items should a stack of stillages topple. Our unique system will also withstand impact from a laden forklift in the event of an accidental crash. This fully self-standing structure has a modular design, providing total flexibility without relying on the structure of the building.

Although Verge Hy-Wall Barrier™ is constructed from modular components, each structure is specifically designed to meet the desired application. Verge Hy-Wall Barrier™ is available in several height options, ranging from 1.5m – 5.5m. Installation is quick and easy, due to the simple, precisely manufactured, modular componentry.

Applications: Features:

- ✓ Warehouse and distribution
- ✓ E-commerce outlets
- ✓ Post and parcel freight facilities
- ✓ Wool stores
- ✓ Modular bolt-together barrier system
- ✓ Multiple height options
- ✓ Designed to contain ULD stillages from falling onto equipment or personnel if toppled
- ✓ Material – mild steel
- ✓ Finish – Yellow

DESCRIPTION	Modular structural steel barrier system designed for the containment of facility stillages & pallets in the event of an incident
APPLICATION	Warehouse and distribution centres, E-commerce outlets, Freight facilities, Wool stores etc.
FINISH	Yellow
