

Verge Wall-PRO™ protects walls against damage from pallets and materials handling equipment.

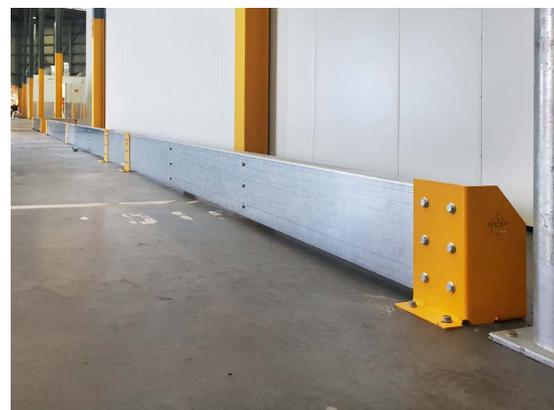

Verge Wall-PRO™ is a very sturdy modular low height barrier system that is fixed to the floor parallel to the wall that is subject to being impacted, avoiding costly repair projects. This product is ideal for protecting cool room panelling where space is sometimes limited, floor surfaces are often slippery, and walls are frequently damaged.

Wall-PRO™ consists of a series of heavy duty 5mm steel bracketing components and modular lengths of barrier rail allowing the barrier to follow the entire contour of the structure protected.

With it's ease of installation and modular component, sections of the barrier can be simply replaced in the event of damage to the barrier.

Features and Benefits

- ✓ Modular – low replacement costs. If it gets damaged you only need to replace the damaged part saving you up to 70%
- ✓ Galvanised and powder coated – won't rust and is highly visible
- ✓ Extremely strong steel construction – prevents costly damage to racking
- ✓ Supplied in kit form – comes complete with fixings
- ✓ Full range of spare parts available
- ✓ Mounts independently of wall – isolates impact
- ✓ Comes flat pack – big savings in transport costs

Specifications

Code	Description	Fixings included	
		M12 x 30 purlin bolts	M16 x 105 through bolts
FV461	Verge Wall-PRO LH end connector 330mm high	6	3
FV462	Verge Wall-PRO RH end connector 330mm high	6	3
FV463	Verge Wall-PRO external corner 330mm high	12	4
FV464	Verge Wall-PRO internal corner 330mm high	12	4
FV465	Verge Wall-PRO straight connector bracket 330mm high	6	2
FV466	Verge Wall-PRO gusset	3	1
