

The **Verge AutoGate** allows you to open and close the mezzanine access gate from your forklift. An innovative invention bringing safety, efficiencies and automation to your warehouse.

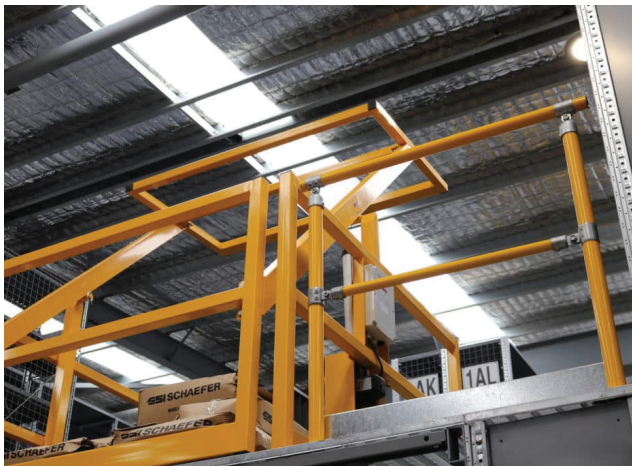

Why motorised?

Consider the time saved by not needing to park the forklift, unstrap the seat belt and walk up the stairs to open and close the gate! Reduces risk of injury by eliminating repetitive movement up and down mezzanine stairs. The Verge Autogate is a forklift drivers dream!

The **Verge AutoGate™ Series** is a 240V powered gate, pre-programmed ready to plug and play. Comes with 2 remotes and this can be increased to accommodate multiple forklifts. When in operation an audible warning signal is sounded to keep personnel clear of the area.

Features and Benefits

- ✓ Ease of operation - safe grip handles
- ✓ Welded frames for superior strength
- ✓ Modular flat-pack kit
- ✓ Wide range of standard sizes
- ✓ Easy to assemble and install
 - no cutting, no welding, no mess
- ✓ 10 Year Warranty
- ✓ Manufactured in Australia
