

Verge V-Boom™ Gate

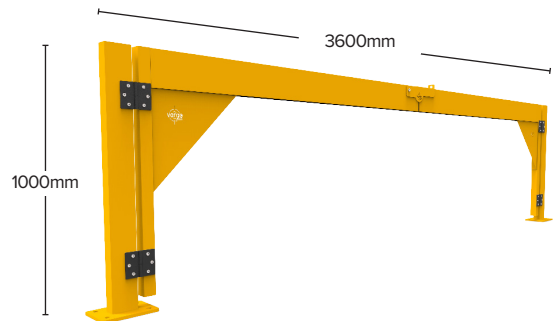

Verge V-Boom Gates™ are the perfect solution where forklift access across a walkway is required. When the gate is opened to allow forklift access, the gate swings across the walkway, temporarily blocking pedestrian access. When closed, the walkway is protected and can be used as normal. Ideal where walkways cross roller doors or forklift thoroughfares.

To reduce risk of workplace injuries, forklift/pedestrian interaction should be kept to a minimum. The V-boom gate helps you to achieve this. The less shared intersections you have, means less risk of accidents!

Features and Benefits

- ✓ Stand alone – includes 2 x steel posts
- ✓ All fixings included
- ✓ Suitable for internal and external use
- ✓ Easily customisable for reduced widths
- ✓ Easy to assemble and install
 - no cutting, no welding, no mess
- ✓ 10 Year Warranty
- ✓ Manufactured in Australia
