Verge Safety Barriers HD Series

Verge HD Barrier™ is a heavy duty modular barrier system designed to safely separate vehicle traffic from pedestrian walkways. Supplied as flat-pack kits ready for assembly, the range also includes a full selection of gates and floor angle to create a complete safety solution.

Why Choose HD Barriers™

- ✓ Tested and Rated for Forklift Impact
- ✓ Superior strength and finish
- ✓ Fully modular, flat pack kits – all fixings included
- ✓ Suitable for internal and external use
- ✓ Available in various sizes to suit your specific needs
- ✓ Great range of accessories
- ✓ Easy to assemble and install – no cutting, no welding, no mess
- ✓ In stock, ready to dispatch.

Verge ECO-Rail™

Verge ECO-Rail™ is a 1m high handrail system designed to keep personnel from straying from designated pathways into harms way! ECO-Rail is a flat pack modular barrier system that comes in 1.5m or 3m kits that simply lock together with couplings to form a continuous barrier at your desired length.

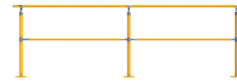

Verge-ECO

It's this simple...

- 1
- 2
- 3

For when you only want a 3m bay or less you choose the stand-alone bay

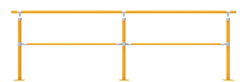

- 1 Starter Bay
Code CV102
3m L X 1m H

- 2 Add-on Bay
Code CV103
3m L X 1m H

- 3 End Bay
Code CV104
3m L X 1m H

- Stand-alone Bay
Code CV101
3m L X 1m H

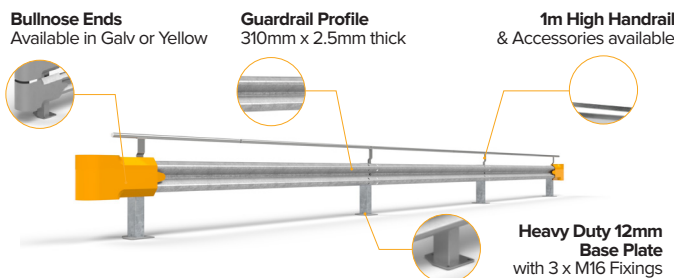

Verge Column Protector Range

Verge Column Protectors safeguard your building's support columns and downpipes from structural damage by protecting them from vehicle impact. Structural columns are common in warehouse facilities and often situated near vehicle traffic. Impact on columns can threaten structural integrity of your building resulting in damage that is costly to repair.

Verge Guard-PRO™

Verge Guard-PRO™ is an advanced guardrail system engineered for optimal safety in all industrial applications. Designed to prevent vehicles from veering off course and colliding with nearby structures or objects, this versatile barriers finds applications in securing industrial facilities, dock areas, or warehouse aisles and offers robust protection against collisions and impacts.

Impact Polymer range

The Impact Polymer Range™ is a complete safety system for high-traffic industrial environments. Barriers, gates, and bollards made from advanced polymer absorb impact and reduce damage to vehicles, equipment, and concrete. Built to withstand repeated impacts, the modular system delivers a durable, low-maintenance solution for warehouses, logistics hubs, and industrial facilities.

- ✓ Australian owned and manufactured
- ✓ Superior strength and finish
- ✓ Independently tested and certified
- ✓ Available in various heights to suit your specific needs
- ✓ In stock, ready to dispatch

Available in two or three rail configuration.

Heavy Duty Forklift Barriers

- ✓ Advanced polymer absorbs impact and reduces damage
- ✓ Flexes on impact and returns to original shape
- ✓ Range includes heavy, medium, and pedestrian barriers
- ✓ Modular system for fast install and easy reconfiguration
- ✓ Non-corroding, hygienic, and ideal for demanding environments

Impact Pedestrian Gates

- ✓ Controls pedestrian access at key traffic interaction points
- ✓ Encourages STOP, LOOK, LISTEN & THINK before entering risk areas
- ✓ Soft-close hinge ensures smooth, controlled operation
- ✓ Self-closing design maintains consistent separation and safety
- ✓ Can be used standalone or integrated with barrier systems

Impact Polymer Bollards

- ✓ Protects equipment, & infrastructure from vehicle impact
- ✓ Flexes under load and returns to original shape after impact
- ✓ Suitable for high-traffic and high-risk industrial environments
- ✓ Non-corroding and ideal for indoor and outdoor use
- ✓ Low-maintenance solution that reduces ongoing repair costs
- ✓ Impact-absorbing to reduce damage to floors and vehicles

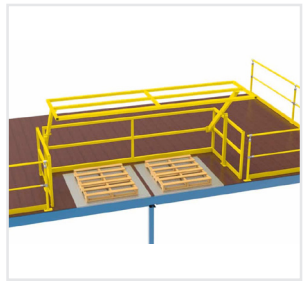

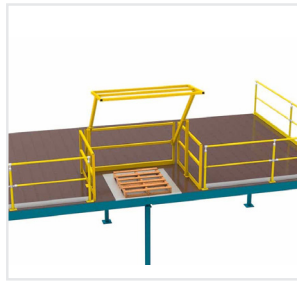

Verge Rollover Gate

The **Verge Roll-Over Gate** is a mezzanine pallet safety gate. It allows pallets to be loaded and unloaded from mezzanine floors safely. The pallet access gate is fast to install, very sturdy and easy to use, and compliant with relevant Australian Standards!

It leaves no exposed edges, keeping operator's safe from the risk of falling. The **Verge Roll-Over Gate** has side barrier panels and a double-sided gate that pivots allowing access to one side at a time. It's made from steel and powder coated yellow which looks great and prevents rust.

	<p>Compliance AUSTRALIAN STANDARD - AS1657-2018 5.4 AND 6.1.1 GUARD RAILING 5.5 AND 6.1.2 TOEBOARD</p>
---	---

Dock-PRO Gate™

The **Verge Dock-PRO Gate™** is designed to prevent people and equipment falling off recessed docks, platforms and service pits.

This gate has two rails (top & middle) which extend from the mounting post to the end post. When shut, the gate acts as a strong physical barrier.

The space saving lift-away design has a lightweight lifting action and nests out of the way with a very small footprint.

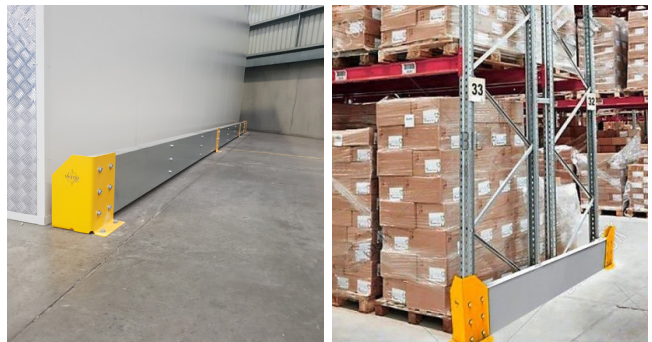

Verge Hy-Wall Barrier™

Verge Hy-Wall Barrier™ is designed to safely contain spillages, ULD stackable crates, and pallets. It helps protect people and assets by containing falling items if stacks topple and can also withstand forklift impact in an accidental collision. Its fully self-supporting, modular design allows flexible compound sizing without relying on the building structure.

Rack-PRO and Wall-PRO

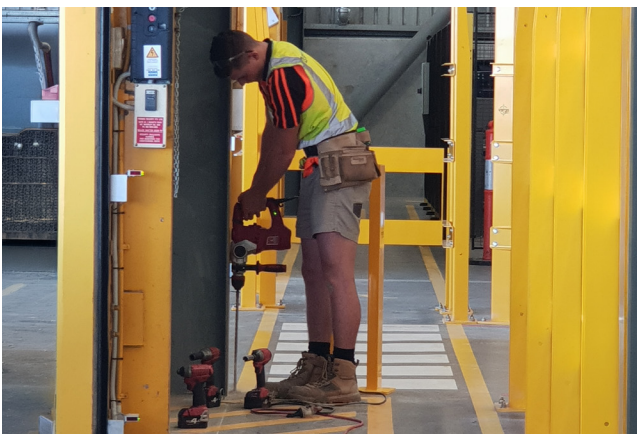

In warehouses, pallet racking and wall damage are major safety risks. The **Verge Rack-PRO Pallet Rack End Protector™** helps protect racking uprights from costly forklift impacts, while the **Verge Wall-PRO™** provides robust protection for walls and infrastructure in high-traffic areas—reducing damage, maintenance costs, and safety hazards.

Supply and Install - Australia Wide

Verge Safety Barriers offer a complete supply and install service nationwide. We work with a range of national clients and have a dedicated network of qualified installers to cover both metro and regional locations Australia-wide. Our comprehensive product range is designed and manufactured in-house in Australia ensuring

consistency, quality and fast turn-around times. With a strong focus on quality control and the use of premium materials, our team delivers solutions built for superior durability and long-term reliability in any environment.
