Verge Wall-PRO MINI™

Supermarket stockrooms and coolrooms are high-traffic environments where space is at a premium and equipment is subjected to constant impact risk. **Wall-PRO Mini** was developed to provide heavy-duty wall and door protection while maintaining a compact footprint, helping maximise valuable operational floor space.

The system combines robust Impact Polymer Bollards with a modular galvanised steel rail system to deliver comprehensive protection for walls, doors, and critical infrastructure. Designed for flexibility, **Wall-PRO Mini** offers a wide range of bollard and rail sizes, along with a complete suite of accessories to protect assets such as sliding doors, rapid doors, downpipes, and service areas.

All steel components are hot-dip galvanised for superior corrosion resistance, while the solid-colour polymer components are engineered for durability and long-term performance. This makes the entire **Wall-PRO Mini** range ideal for use in coolrooms, freezers, and other demanding retail environments.

Delivering maximum impact protection with a minimal footprint, **Wall-PRO Mini** is the smart solution for protecting critical assets in modern retail facilities.

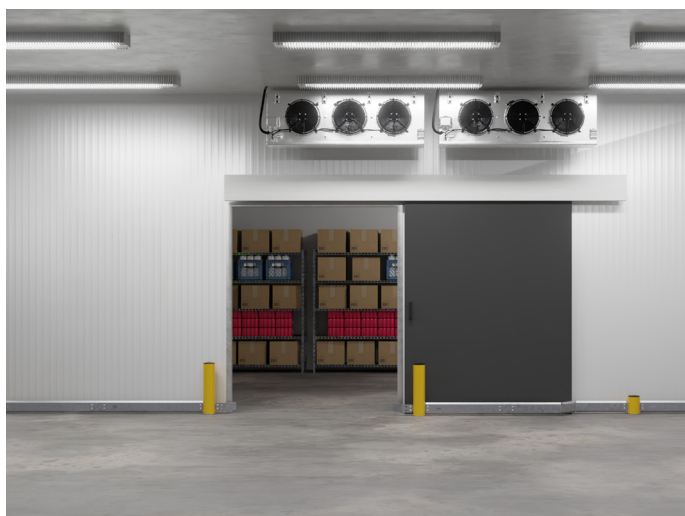

Applications:

- ✓ Supermarket stockrooms
- ✓ Coolrooms & freezers
- ✓ Quarantine Facilities
- ✓ Back of House Storage areas
- ✓ MHE Charging areas

Features:

- ✓ Made in Australia
- ✓ Hot Dip Galvanised Steel & Polymer materials for long lasting protection
- ✓ Modular system for ease of installation
- ✓ Full range of accessories for protection to all areas
- ✓ Designed for high-traffic retail environments
